

sku #25057

Step 1

Remove End Cap and slide one Nylon Washer from the Horizontal Axle.

Step 2

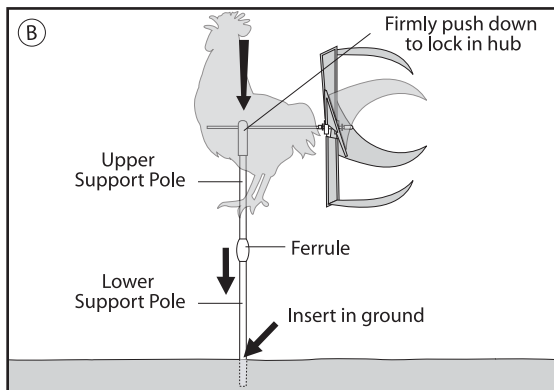

Slide Spinner Wings onto the Horizontal Axle with the streamers facing away from the Rooster body. Replace the Nylon Washer and End Cap.

Step 3

Slide the narrow tip of Upper Support Pole into Hub. Push the Support Pole firmly down until it locks into place and cannot be removed. This is best done with the base of the Upper Support Pole on a hard surface and pushing the pole into place.

Step 4

Connect Upper Support Pole with Lower Support Pole and insert into the ground.

PLEASE NOTE: *It is recommended that you take your Petite Spinner inside during storms and harsh weather to preserve its durability.*
