

## #25111 FLYING RUBY-THROATED HUMMINGBIRD ASSEMBLY INSTRUCTIONS

1. Attach the Front Body Half of the Hummingbird to the Main Hub by sliding the square rod (from *within* the Front Body Half) into the square aluminum ferrule in the main hub.
3. Close Velcro openings on the Front Body Half.
4. Attach Wing Fins to Wing Hub. **Please note that Wing Fins are inserted at an offset pattern.** Make sure Wing Fins are fully inserted into hub holes. You will hear a "click" sound when the pins are in all the way.

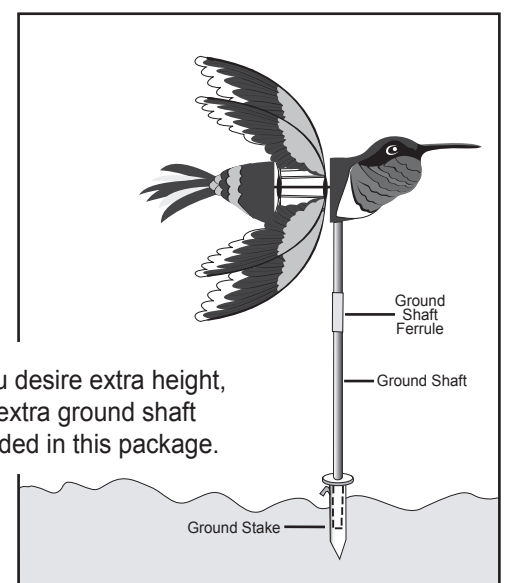

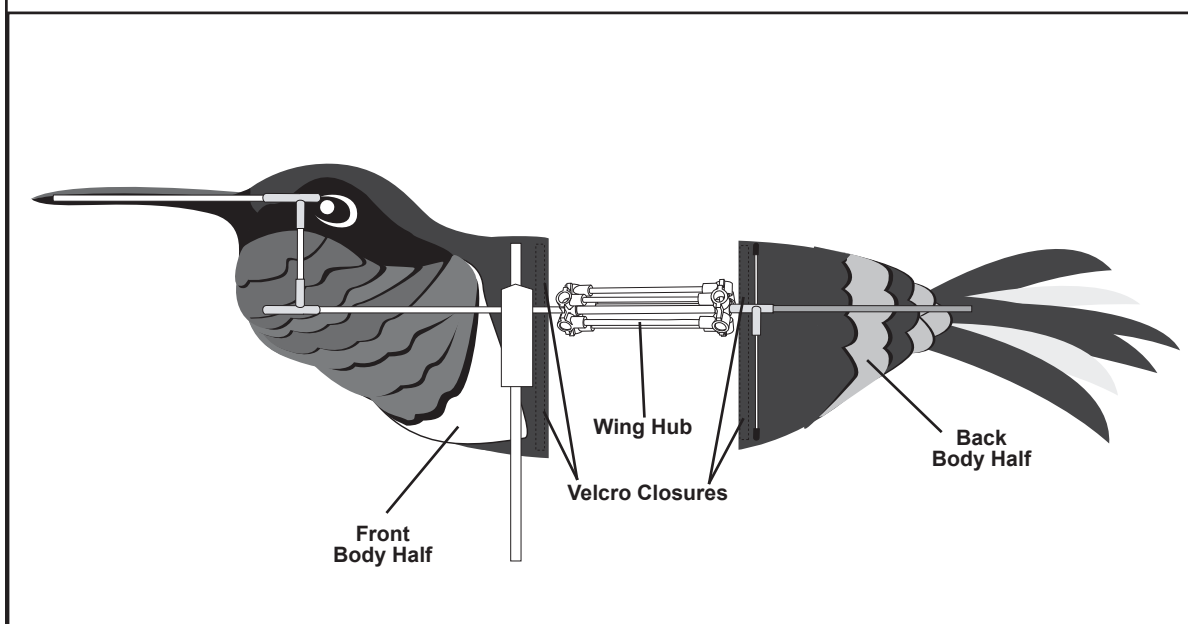

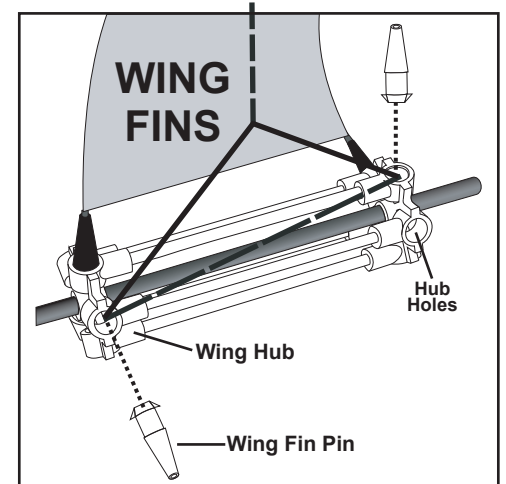

**PLEASE NOTE: If you make a mistake in the placement of the Wing Fins (i.e. backward, wrong color sequence, etc.), you can remove them by carefully inserting a small flat end screwdriver between the base of the Wing Fin Pin and the hub and pushing it in and out.**

5. Drive Ground Stake into ground. Slide Ground Shaft into Ground Stake. Slide Main Hub Assembly with Garden Spinner over Ground Shaft Ferrule. If you desire extra height, add the extra ground shaft included in this package.

**PLEASE NOTE: Although your Garden Spinner is constructed with UV resistant SolarMax™ fabric, to preserve its durability, we recommend taking the Spinner inside during harsh weather or when not in use.**

**PLEASE NOTE THAT WING FINNS ARE INSERTED AT AN OFFSET PATTERN**

If you desire extra height, add extra ground shaft included in this package.
