

ASSEMBLY INSTRUCTIONS FOR SMALL RAINBOW BALL GARDEN SPINNER # 25411

Step 1: Assemble the ball first. Slide ball fabric assembly over the long rod with the two loose hubs on it. Insert rods into top hub starting from one hole and working around the circle. Please note the last hole will fit tightly. Repeat this process on the lower hub until you complete the ball.

Step 2: Drive the stake into the ground where you want to place your spinner. Stick one vertical strut into stake with the ferrule facing up. Slide the second stick into the first one.

Step 3: Slide the assembled ball unit on to the second stick.

NOTE: The spinner can be mounted on a deck or fence with a deck mount, part # 23923, which is available as an accessory.
