

Unicorn Bike Spinner assembly instructions

sku #26873

Step 1

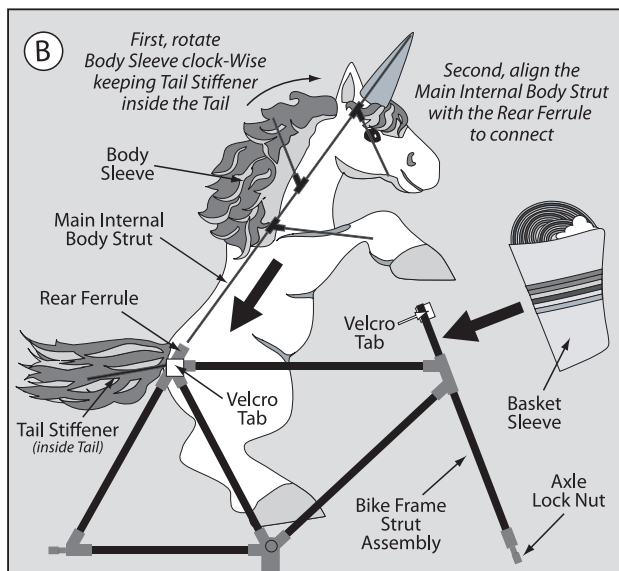

The decorative elements of your Unicorn Bike is shipped in two sections: the Body Sleeve and the Basket Sleeve (diagram B). The Main Internal Body Strut Assembly is already sewn inside of the Body Sleeve. First fold back the fabric of the Body Sleeve to insert the Tail Stiffener rod, which is attached to the Bike Frame Strut Assembly (Diagram A).

Step 2

With the Tail Stiffener inside the Tail of the Body Sleeve, connect the Main Internal Body Strut to the Rear Ferrule of the Bike Frame Strut Assembly (Diagram B). You will need to rotate the Body Sleeve clock-wise to align and connect the Main Internal Body Strut to the Rear Ferrule while keeping the Tail Stiffener inside the Tail (Diagram B).

Step 3

Attach the Basket Sleeve to the front of the Bike Frame Strut Assembly (Diagram B). Then, attach all Velcro Tabs on the inside of the Body Sleeve and the Basket Sleeve to the corresponding Velcro Tabs on the Bike Frame Strut Assembly (Diagram B).

Step 4

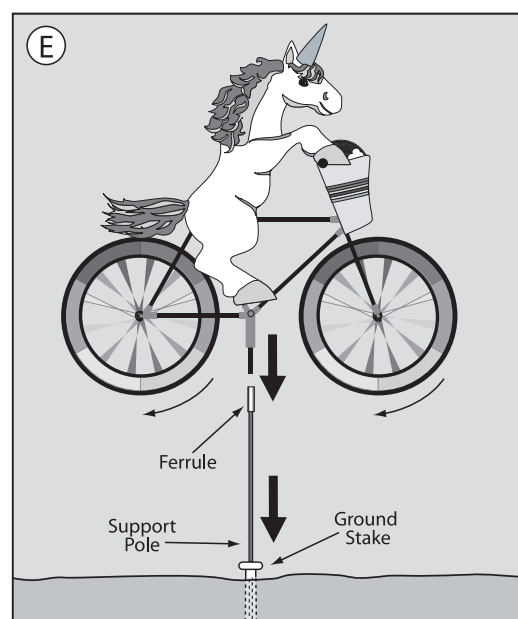

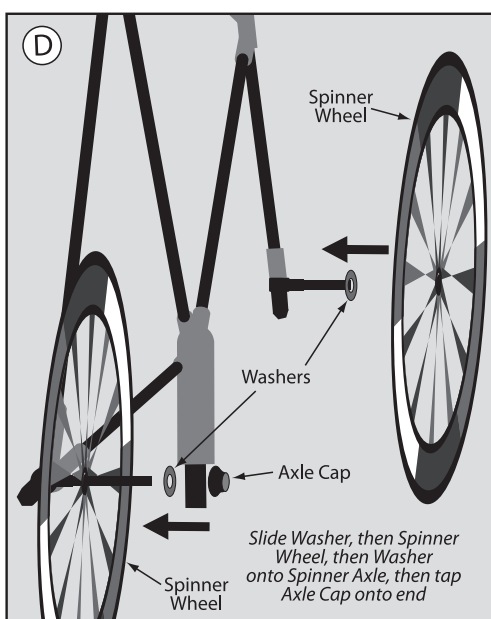

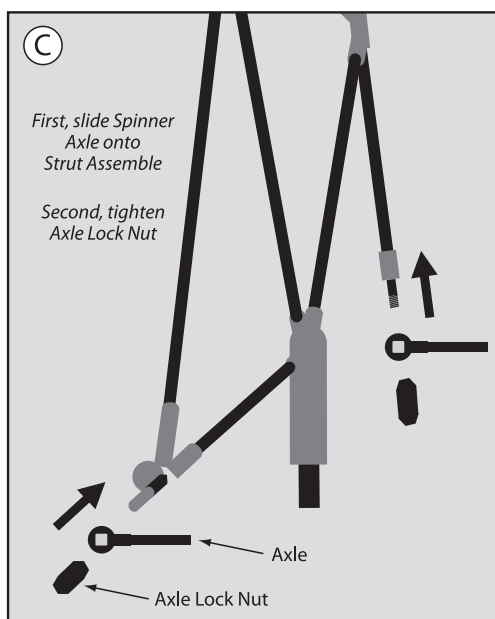

Unscrew the threaded Axle Lock Nuts. Then, slide one of the Axles onto the rear axle fitting. The Axle can point either to the right or left but not to the top or bottom, since this is where the Spinner Wheel will sit. Replace the threaded Axle Lock Nut and tighten. Repeat with the front axle fitting, making sure the Axle is pointed the same direction as the rear axle. (Diagram C)

Step 5

Slide Spinner Wheel and Washers onto Axle. The Washers should be placed on either side of the Wheel. Tap Axle Caps onto ends of the Axles using a mallet or piece of wood. (Diagram D)

Step 6

Drive the Ground Stake into ground and insert the non-ferruled end of the Support Pole into the Ground Stake. Insert the Upper Pole Section of your completed Unicorn Bike Spinner into the Ferrule on top of the Support Pole. (Diagram E)

PLEASE NOTE: Although your Bicycle Spinner is constructed with UV resistant SunTex™ fabric, it is recommended that you take it inside during storms and harsh weather to preserve its durability.
