

40" New Holland Tractor *assembly instructions*

sku #26901

Completed Internal Strut Assembly.
Make sure all parts connect as shown.

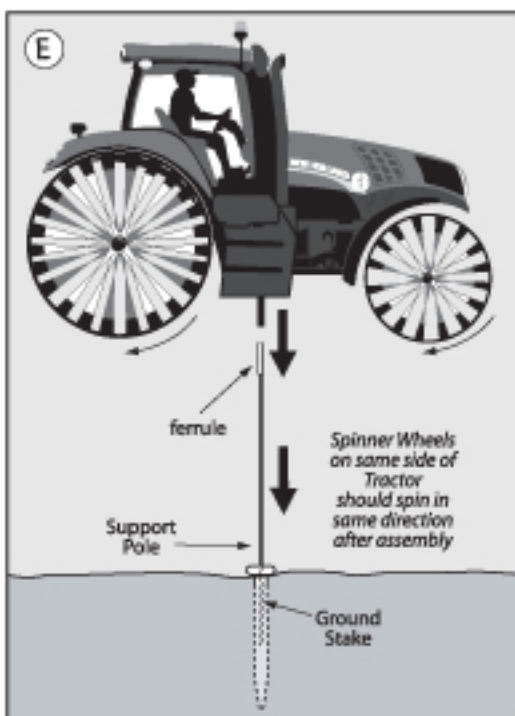

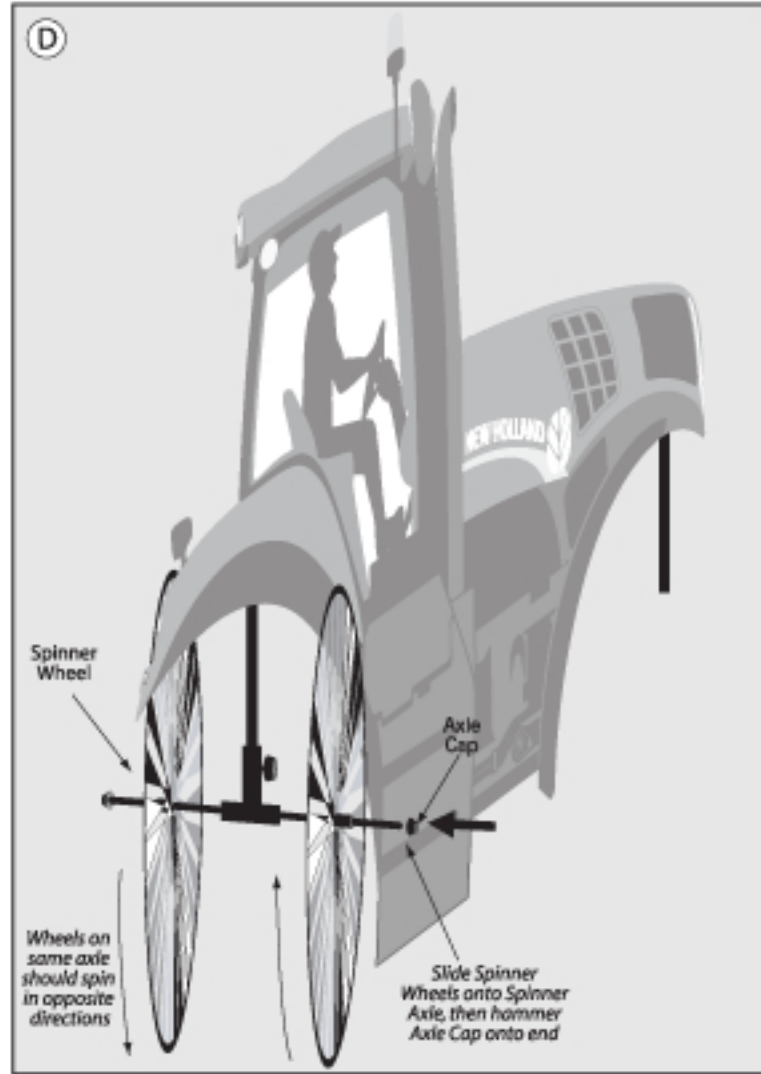

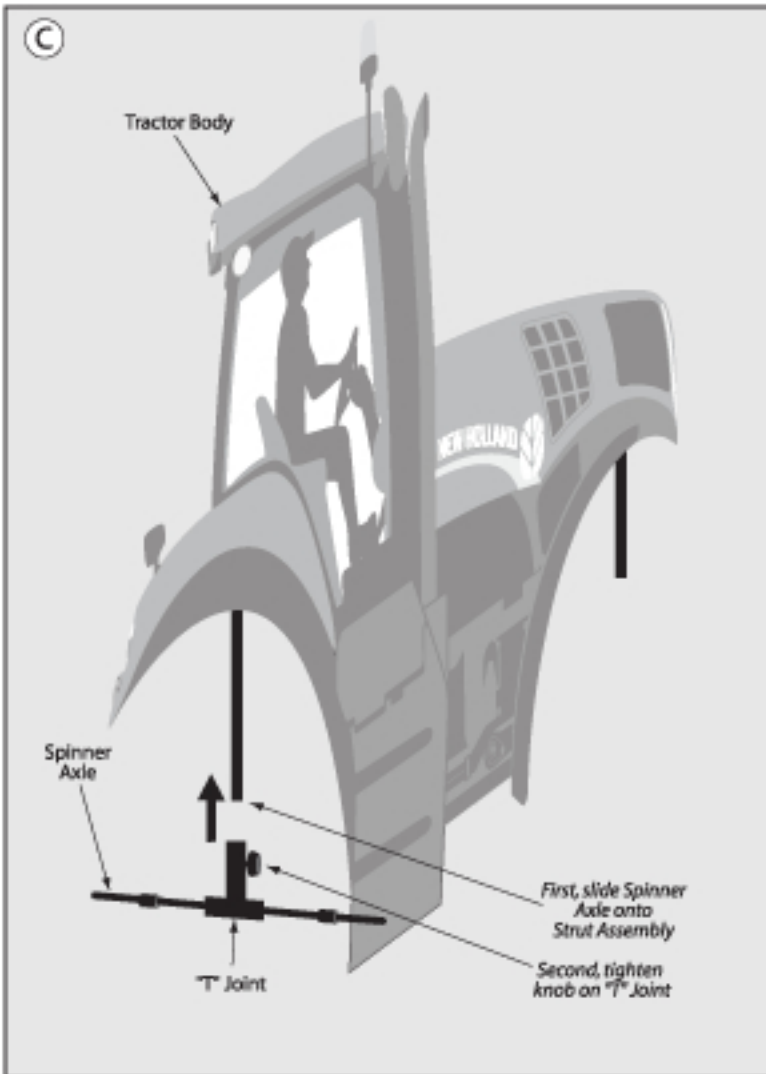

Step 1

The Strut Assembly of your New Holland Tractor spinner is shipped in three sections. Connect Center Rod of the Front Strut Assembly to the Center Rod of the Center Strut Assembly as shown. (diagram A)

Step 2

Open Velcro seam and connect the Center Rod of the Internal Rear Strut Assembly to the Center Strut Assembly. Insert completed Strut Assembly into bottom of the New Holland Tractor Body Sleeve as shown. It is easiest to connect the Struts before sliding the Front of the Strut Assembly into place. Reclose Velcro seam. (diagram B)

Step 3

Take one of the Spinner Axles and slide it onto the Rear Strut Assembly at back of New Holland Tractor Body. Tighten knob on the "T" Joint to hold the Axles to the Struts. (diagram C)

Step 4

Take one of the four Spinner Wheels and slide it onto one of the two Spinner Axles. Slide second Spinner Wheel onto Spinner Axle. (**Note: Spinner Wheels on same side of Tractor should spin in same direction and Spinner Wheels on same axle should spin in opposite directions. Before putting second Axle Cap into place, make sure wheels spin as shown in diagrams D and E.**) Pound second Axle Cap onto uncapped end of Spinner Axle using a mallet or piece of wood. (diagram D)

Step 5

Repeat Step 4 using second Spinner Axle and the two remaining Spinner Wheels to assemble the front Spinner.

Step 6

Pound Ground Stake into ground and insert non-ferruled end of Support Pole into Ground Stake. Insert Upper Pole Section of completed New Holland Tractor Spinner into ferrule on top of Support Pole. (diagram E)

PLEASE NOTE: Although your New Holland Tractor Spinner is constructed with UV resistant SunTex™ fabric, it is recommended that you take it inside during storms and harsh weather to preserve its durability.
