- easy to fly & assemble
- uses 30 lb. Test Line
- see instructions on back

# 7 ft. Shark kite

Wingspan: 55 in. / 140 cm  
Length: 85 in. / 216 cm.

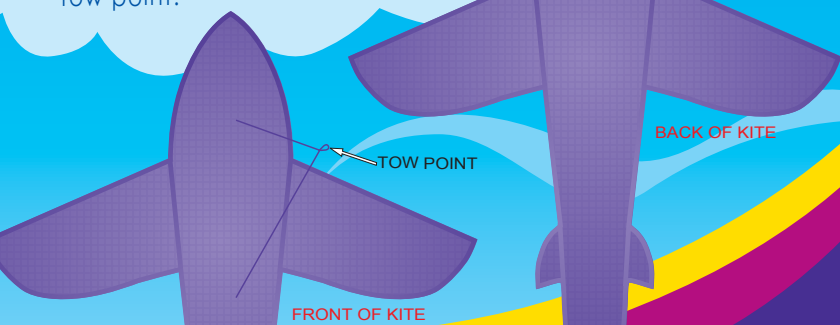

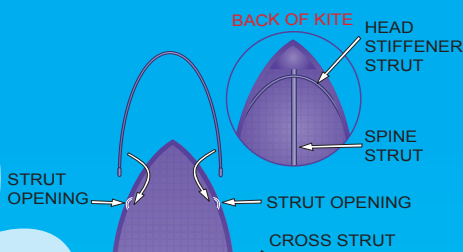

## BLACK SHARK

Wind Range: 5 - 18 mph

### get ready:

- Insert the cross strut into the pockets at the leading edge.
- Bend head stiffener strut and slip into strut opening. Push strut all the way down into sleeves.
- Attach your line to the tow point.

### to fly:

Have a friend stand about 75 feet downwind from you and hold the kite with its nose pointed towards the sky. As the wind catches the kite, signal your friend to release it while you steadily pull in line until the kite is aloft. As the kite flies upward, slowly release more line.

For more information about kites and kiting events in your area visit the American Kiteflyers Association website: [www.aka.kite.org](http://www.aka.kite.org) Happy flying!
