

get ready:

- Connect the tail struts at the joining ferrule. Make sure the rod goes all the way into the bottom of the ferrule.
- Insert the wing struts into the center fitting.
- Attach your line to the tow point.

PREMIER KITES

to fly:

Have a friend stand about 75 feet downwind from you and hold the kite with its nose pointed towards the sky. As the wind catches the kite, signal your friend to release it while you steadily pull in line until the kite is aloft. As the kite flies upward, slowly release more line.

For more information about kites and kiting events in your area visit the American Kitefliers Association website: www.aka.kite.org Happy flying!
