

MEGA WILD THING *assembly instructions*

Step 1:
Unroll the kite.

Step 2:
Identify and organize struts. (Diagram A.)

Step 3:
Assemble the Spine. (Diagram B) Slide the assembled Spine into the Spine Pockets. (Diagram C) Make sure the dihedral is pointing upwards as seen in the diagram.

Step 4:
Insert the main cross spars into the dihedral located on the spine and the Wing Connectors. (Diagram D) The spars will go through back of the bridle line. (Diagram E)

Step 5:

Insert the ear spreaders into the ear pockets located at the top of the ears and in the center ear pocket located just above the dihedral.

Step 6:

Insert the Lower Body Spreaders into the Lower Body Pockets located at the end of the body just above the tail. Note that one of the Lower Body Spreaders will go behind the Spine. (Diagram F)

Step 7:

Insert the Rear Cross Strut into the Rear Cross Strut Connectors located on both Main Body Spreaders. Note: You will have to bend the Rear Cross Strut slightly in order to make the Rear Cross Strut fit into both connectors.

FLIGHT INSTRUCTIONS:

- Attach flying line to Tow Loop.
- Have a friend stand about 75 ft. downwind from you and hold the kite with its Leading Edge pointed towards the sky.
- As the wind catches the kite, signal your friend to release it while you bring in the line with long steady pulls.
- Slowly let out more line as the upward.

RECOMMENDED LINE: 250 LB TEST LINE

OPTIMUM WIND CONDITIONS FOR MEGA WILD THING

BEAUFORT SCALE	CALM	LIGHT AIR	LIGHT BREEZE	GENTLE BREEZE	MODERATE BREEZE	FRESH BREEZE	STRONG BREEZE
(M.P.H.)	0	1-3	4-6	8-10	14-17	20-24	25-30
WIND	smoke rises vertically	Direction of wind shown by smoke, but not by wind-veges	Wind felt on face, leaves rustle, ordinary vane moves	Leaves and small twigs in constant motion, wind extends light flag	Raises dust and loose paper, small branches move	Small trees & leaves begin to sway, crested wavelets form on inland water	Large branches in motion, utility wire whistle, windows rattle

Mega Wild Thing

Note: Wind conditions aloft may vary considerably from those found near ground level.
